

## TECHNICAL INFORMATION TIMBERTREAT PLUS BITUMEN Timber Finish

### ABOUT TIMBERTREAT PLUS BITUMEN TIMBER FINISH:

Cooee TimberTreat Plus Bitumen Timber Finish is a timber finish designed for use on timber that comes in contact with the ground.

Bitumen is a natural, safe water-repelling agent that enhances the capability of the product when it is in constant contact with the ground. All timber in contact with the ground (fence and verandah posts, sleepers, garden stakes, logs, poles) can be coated with TimberTreat Plus Bitumen Timber Finish. The product dries dark brown.

### BENEFITS:

- Approved product for use on organic farms by the Biological Farmers Association (BFA).
- The coating is flexible, so will expand and contract with the timber
- Easy to apply with brush, spray, roller or by dipping.

### APPLICATION METHOD:

1. Thoroughly SHAKE & STIR before and during application.
2. Clean any dirt or dust from the timber.
3. Apply with a brush, roller and spray or by dipping.
4. Apply two coats. Allow one hour between coats. Typical application rates are 8-10 sq m per litre per coat.
5. Posts should have the coating extended at least 10 cm out of the ground.
6. Clean equipment or spills with mineral turpentine.
